

Are you looking for reliable state-of-the-art flow chemistry solutions?

Flow Chemistry Systems

Our Flow Chemistry Systems are optimally integrated one-stop solutions for continuous flow processes

Successful Chemistries:

- Nitration
- Chlorination
- Isomerization
- Esterification
- Epoxidation/Oxidation

Advantages of Flow Chemistry

- Faster process development and optimization
- Improvement in Efficiency and Productivity
- Reduction in Equipment Size (Footprint reduction)
- Reduction in Waste Generation and Downstream Processing
- Consistent Quality and Superior Quality Control
- Enhanced Safety
