

Are you looking for reliable state-of-the-art flow chemistry solutions?

INTENSEFLO

Reactor Series

Our INTENSEFLO series of reactors is innovatively designed for superior mixing and enhanced heat transfer.

MOC options compatible to complete range of chemistries

Scalability for laboratory, pilot and production requirements

Design optimized through advanced CFD

Customized designs for lab and manufacturing

Applications: Pharmaceutical, Agro chemicals, Fine and Specialty chemicals industries

Specifications:

- Temperature: -60° to 250°
- Pressure: up to 30 bar
- MOC options: SS316, Hastelloy C276
- Volume:
 - Lab scale (10ml)
 - Pilot scale (100 ml)
 - Production scale (1l onwards)

We also offer:

- Consultancy for adaptation of flow chemistry from POC to production
- Consultancy for finding techno-commercially optimum flow chemistry solutions
- Customized solutions for specific chemistries and processes
- Training to industry professionals in Flow Chemistry
